

Frontend Assessment

Sample API for episodes - <https://api.sampleapis.com/futurama/episodes>

Video placeholder - <https://youtu.be/ScMzlvxBSi4>

Develop a UI dashboard listing all the episodes from the above mentioned API

The episodes should show the title, original Air dates and description.

Put the placeholder video for each episode that will play the video in full screen when clicked on.

Feel free to design the UI the way you like it.

Brownie points for good looking UI.

Tech stack - ReactJS/React typescript preferable. Any javascript framework of your choice

Submission:

Create a file – Public repo and share a link.
